Notable Projects

Winners Chapel Indianapolis Website

Role: *Lead Developer & Designer*

Redesigned the digital experience for the church, optimizing usability, mobile responsiveness, and accessibility while maintaining brand identity. Achieved a 45% increase in visitor engagement.

Guard Management System (Admin Dashboard)

Role: *UI/UX Designer & Developer*

Designed an intuitive dashboard with a collapsible sidebar, real-time metrics, and smooth UX flows for guard check-ins and incident management.

Linktree Clone (Personalized UI)

Role: *Solo Designer/Developer*

Built a fully responsive, brand-customizable Linktree alternative with modern UI, animations, and social integrations.

3. ITTMS (Intelligent Transport & Traffic Management System) – Web Platform

Role: *Lead Developer*

Created a simplified interface and payment flow integrated with Remita APIs, tailored for informal transport workers.

Almost Home Restaurant

Role: *Lead Designer & Developer*

Designed and developed the restaurant's entire digital platform, including an elegant homepage, interactive menu system, blog CMS, and mobile-responsive interface that increased customer engagement and retention.

GiopatDC – Corporate Website & Management Portal

Role: Lead Developer

Developed a responsive corporate website and internal management dashboard for GiopatDC, a technology and development consultancy.

Bozid Dental Clinic – Patient Website

Role: Front-End Developer / UX Designer

Built a clean, patient-focused web experience for a dental clinic to improve online presence and bookings. Developed a mobile-first website emphasizing patient trust and easy navigation.

JoeHomes – Real Estate Website

Role: Web Developer

Built a fully responsive, brand-customizable Linktree alternative with modern UI, animations, and social integrations. Enhanced SEO and structured metadata for search visibility.

Iduma Igariwey – Personal Brand Website

Role: Developer & Designer

Created a personal portfolio website for a Nigerian politician and legal expert. Designed an engaging front-end that reflects professional credibility.

GOV ITTMS – Government-Focused Portal

Role: Lead PHP Developer

Developed a streamlined, secured portal for transport compliance tracking. Built dashboard interface and login system and integrated backend reporting and analytics for administrators.
